

PTI AMSYSCO Scholarship

This award was established in 2011 by AMSYSCO, Inc. to commemorate the company's 30 years in the post-tensioning industry. In announcing this new scholarship program, AMSYSCO owner, **Rattan Khosa** remarked *"Last week AMSYSCO completed 30 years in business. Only in this great country America, one can come with just \$8 and later start a business in a basement. Over the years I have been returning to the community, part of what I make every year, through my private foundation named after my parents. I thought it was time that I did something for the post tensioning. It will be great to award scholarships through PTI."*

The AMSYSCO Scholarship will provide two engineering students with \$2,500 each for the Winter/Spring 2012 school term. The students must attend an accredited U.S. engineering undergraduate or graduate program with preference given to those attending the University of Maryland, and the University of Illinois at Urbana, IL. The student is required to be in good standing academically and must be pursuing a civil and/or structural engineering degree. Preference will also be given to students studying and/or researching in the field of post-tensioned concrete.

Award recipients will be selected and announced March 30, 2012. In addition, the award recipient will be honored at an awards ceremony that will be held in conjunction with the Post-Tensioning Institute's 2012 Annual Technical Conference. The student will be invited to attend the conference and awards presentation at PTI expense.

Key Dates:	
February 29, 2012	Deadline for returning application and required information
March 30, 2012	Scholarship recipients announced
May, 2012	Awards Ceremony – 2012 PTI Technical Conference
